The Report recommends a centralised, operational model for Ireland.

Do you agree with this recommendation?

YES

Are there other models you believe could work in an Irish context?

NO

What role should waste collectors play in the operation of a DRS?

Make it the responsibility of Retailers and Producers! They may contract waste collectors.

The DRS study proposes a deposit per container of €0.20. Do you think this is appropriate?

It is too low. It should be 0.50€ for ALL containers

Consumers need to know about a DRS long before it becomes operational –do you have any suggestions as to how best the introduction of a DRS can be communicated to the public?

Make it the responsibility of Retailers and Producers! If they have to pay back deposits they will make sure systems are in place and are being communicated.

What enforcement measures should be considered in parallel with the introduction of a DRS?

Make it the responsibility of Retailers and Producers! Set return rates for containers, if they are not met fine the producer or retailer.

How should cross-border issues be treated to ensure producers are not at a competitive disadvantage relative to producers in Northern Ireland?

Tax products that have no DRS
