

## **Decision on Specific Prospecting Activities**

The Minister has assessed the exploration project proposed by the company and has determined that the activities are not likely to have a significant effect on the environment.

Company Glencore Zinc Ireland Ltd Drilling in an area of 2.49km² in the eastern portion of PLA 635 and western portion of PLA 636.  The drilling area is located approximately 4km from the nearest Natura 2000 Site (Lower River Shannon SAC), approximately 14km from the nearest Natural Heritage Area (Woodcock Hill Bog) and approximately 4km from the nearest Natural Heritage Area (Woodcock Hill Bog) and approximately 4km from the nearest Natural Heritage Area (Woodcock Hill Bog) and approximately 4km from the nearest Natural Heritage Area (Woodcock Hill Bog) and approximately 4km from the nearest Natural Heritage Area (Woodcock Hill Bog) and approximately 4km from the nearest Natural Heritage Area (Woodcock Hill Bog) and approximately 4km from the nearest Natural Heritage Area (Woodcock Hill Bog) and approximately 4km from the nearest suppresses used will be non-hazardous, non-toxic and biodegradable. The drilling is not likely to have a significant effect on the environment.  Lower River Shannon SAC (002165) River Shannon and River Fergus Estuaries SPA (004077)  A screening determination has been carried out for the project. Particular attention has been paid to the European Site listed above.  European Sites  It has been determined that the project does not have the potential for significant effects on a European Site on the basis that:  -The activity is temporary -There will be no direct discharge of drilling fluids into surface water systems.  -The drilling area, at its closest point, approximately 4km from the nearest European Site.  Environmental Information available on Groundwater (2019)  2. Guidance for Good Environmental Practice in Mineral Exploration (2019)  3. Expert Environmental Safeguards-The Irish Way (2006) 4. Expert Environmental Guidance R4 – Drilling (2017)  Department of the Environment, Climate & Communications	DI A	005 0 000 0 1 1/2 2/21
Activity  Drilling in an area of 2.49km² in the eastern portion of PLA 635 and western portion of PLA 636.  The drilling area is located approximately 4km from the nearest Natura 2000 Site (Lower River Shannon SAC), approximately 14km from the nearest Natural Heritage Area (Woodcock Hill Bog) and approximately 4.9km from the nearest proposed Natural Heritage Areas (Skoolhill). The company is using small volumes of treated stream water for drilling purposes. All drilling water will be re-circulated. Any drilling additives or greases used will be non-hazardous, non-toxic and biodegradable. The drilling is not likely to have a significant effect on the environment.  Lower River Shannon SAC (002165) River Shannon and River Fergus Estuaries SPA (004077)  A screening determination has been carried out for the project. Particular attention has been paid to the European Site listed above.  European Sites  It has been determined that the project does not have the potential for significant effects on a European Site on the basis that:  *The activity is temporary *There will be no direct discharge of drilling fluids into surface water systems.  *The drilling area, at its closest point, approximately 4km from the nearest European Site.  Environmental Information available on DECC website  1. Exploration Drilling - Guidance on Discharge to Surface and Groundwater (2019)  2. Guidance for Good Environmental Practice in Mineral Exploration (2019)  3. Environmental Safeguards- The Irish Way (2006)  4. Expert Environmental Guidance R4 – Drilling (2017)	PL Area	635 & 636 Co. Limerick
