GENI 1. 2. 3. 4.	ERAL NOTES: This drawing is for information and reference only, designers are responsible for co-ordination issues and compliance with Building Regulations. Doors shall provide 850 mm clear opening width, except where indicated otherwise. Do not scale the drawing. Use figured dimensions only. All dimensions given are in millimetres. All room dimensions are "internal dimensions".		COM LAYOUTS: RED SCIEN(TION 2 - Dee			AN ROINN OID THE DEPARTMEN Plan
5. 6. 7.	Area = net internal area of the room. All elevations are internal room elevations. Any discrepancies between this document and other documents shall be reported to the Department.	DRG NO: RT - 011.5	ISSUE NO: 01	^{SCALE:} 1: 100 @ A3	DATE: Sept 2011	

 Preparation Room to be used for adjacent 'shallow plan' laboratories. This document should be read in conjunction with with the Technical Guidance Documents (TDGs) as published by the Department of Education & Skills. Final position of data points and associated power outlets shall be above desk/worktop height. Dado trunking shall feed from above in ground floor situations and from ceiling void below if room is located on upper floors. Small radiator with Thermostatic Control Valve (TVR) to be provided in the secure chemical store. Natural light and ventilation to be provided for this room. 				
This document provides guidance in reliation to the requirements for a Shared Science Preparation Room to be used for adjacent shallow plari laboratories. This document should be read in conjunction with with the Technical Guidance Documents (TDGs) as published by the Department of Education & Skills. Enal position of data points and associated power outlets shall be above desk/worktop height. Dado trunking shall feed from above in ground floor situations and from ceiling void below if room is located on upper floors. Small readitor with Thermostatic Control Valve (TVR) to be provided in the secure chemical store. Natural light and ventilation to be provided for this room. Where preparation area serves more than one laboratory then an independent gas pressure proving system is required. Adjacent Science laboratory have shared preparation area with same services plus additional storage. Configuration will depend on design solution. Non-slip floor finish required.
